

No oficial nspluginwrapper & ia32-libs-gtk packages para Debianamd64 Etch

Para los que tienen linux a 64 bits.

Primero entrar como root:

- Añadir al repositorio al sources.list:
echo "deb http://www.dipconsultants.com/debian etch main"

Que esta en /etc/apt/sources.list

apt-get update (actualizar)

Install the keyring so you're not bothered with key/verification warnings:

apt-get install markybob-keyring

apt-get update una vez mas

Instalar:

apt-get install ia32-libs-gtk nspluginwrapper

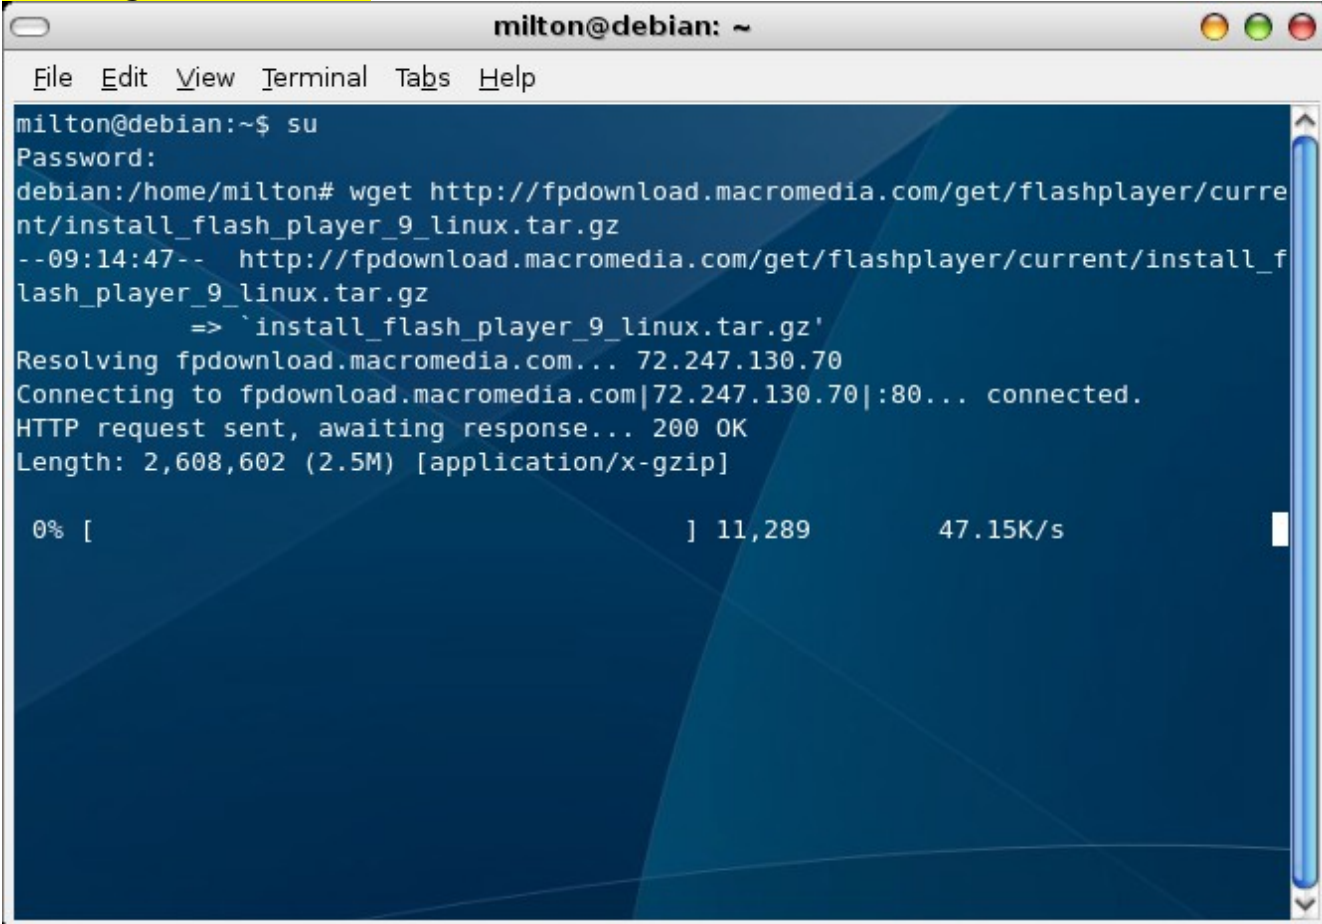

Instalando Flash de 32 en el navegador de 64-bit:

Estramos en la consola como root:

wget

http://fpdownload.macromedia.com/get/flashplayer/current/install_flash_player_9_linux.tar.gz

(descarga del internet)

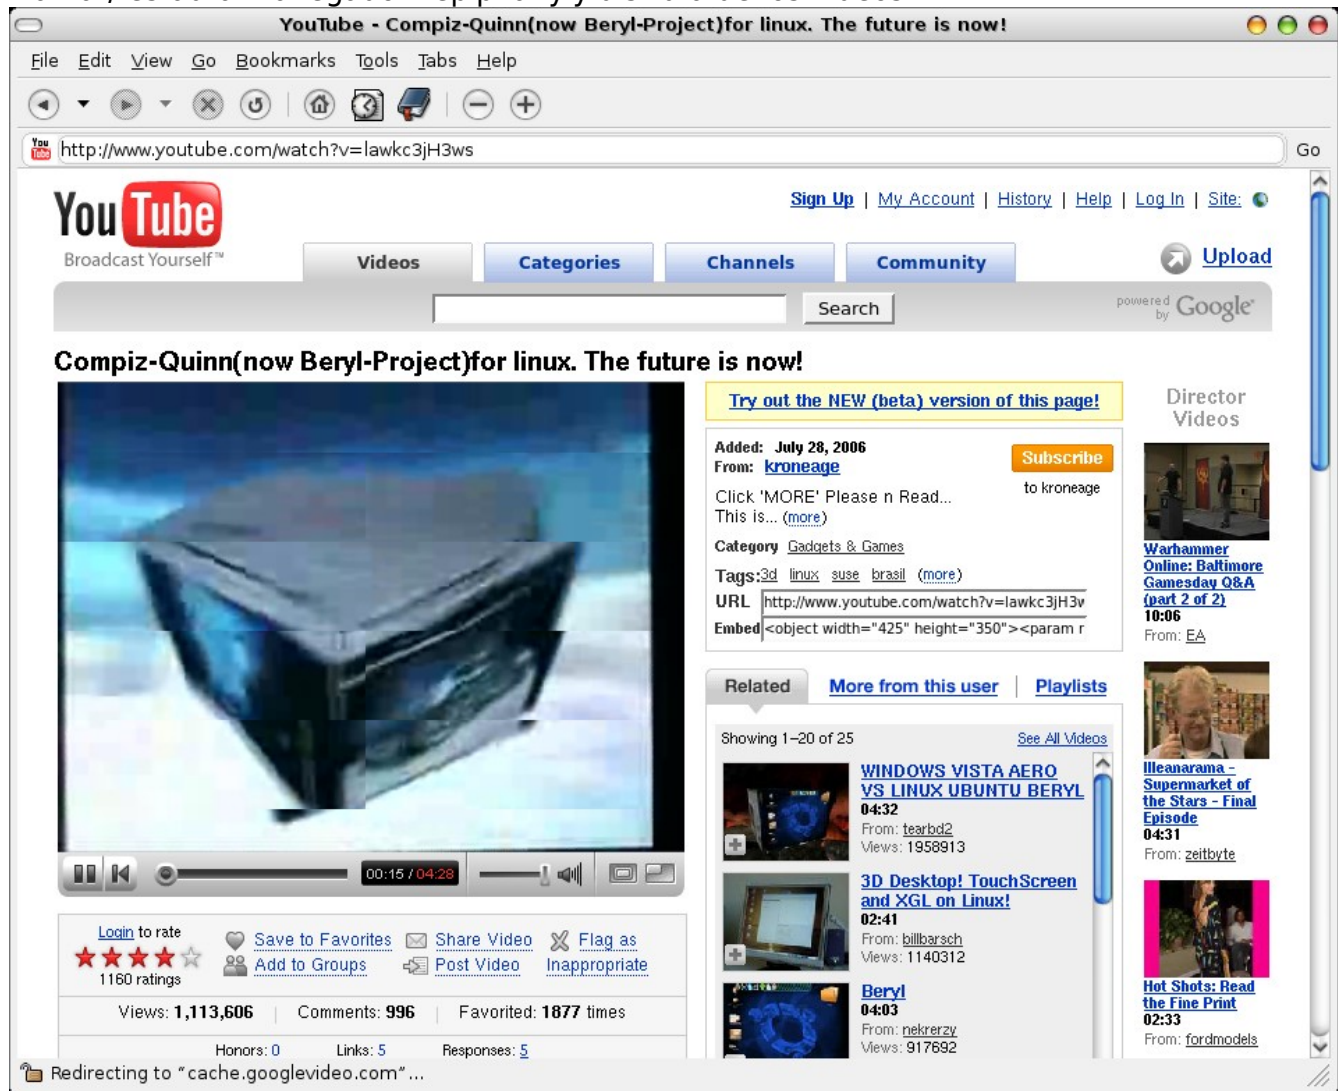

```
